

Aquapacs

Keeping equipment dry

Water is the enemy of all electronic devices. Our leather cases help protect radios from rain and snow but for extreme weather and underwater environments they need the extra help of a fully waterproof Aquapac.

Aquapacs are very easy to load and seal in seconds. Radios can be used whilst inside the Aquapac.

Available in three sizes to suit many radios. Please contact us for details.

RWBAG04

RWBAG04 KFNOD

RWBAG04
